DETAILED ACTION

1. This is a supplemental allowance made in order to correct priority information.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Please replace the paragraph under RELATED APPLICATION with the following:

“This application claims priority from Japanese Patent Application No. 2004-087853, filed March 24, 2004, which is incorporated by reference in its entirety.”

Allowable Subject Matter

3. Claims 1, 2, 7 – 9 are allowed.
4. The following is an examiner's statement of reasons for allowance:

The closest prior art reference to the claimed invention appears to be Bergeron (US 3,652,414). Bergeron teaches a grease composition comprising a base lubricating agent such as mineral oil in amount of from 4 to 92.5 % by weight, solids which can comprise copper alone in amounts of from 5 to 90% by weight, and a thickener such as calcium complex soap (column 2 lines 5 – 21). The mineral oil has a viscosity of from about 100 to 500 SUS at

100°F, which is equivalent to 21 to 108 cSt at 37.7°C (approx 40°C). Bergeron does not particularly recite grease compositions having a mixing consistency adjusted to range from 265 to 475, nor does the prior art recite the buffer particles having particle size of from 100 to 200µm. No other reference in the prior art teaches the claimed buffer particles having the particle sizes of the claims. Therefore the claims are allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion
